<i>Current Stocking:</i>	none
<i>Historic Stocking (last year stocked):</i>	none
<i>Contaminants (species tested):</i>	no testing done
<i>Assessment:</i>	<i>Completed Projects:</i>
	1972 lake survey

Synopsis

The lake survey in 1972 found a large population of white suckers in the lake. The majority of the lake is surrounded by private land, while a few Crown land parcels border the lake on the south side. It appears that no game fish populate the lake. Access is unknown without crossing private land.
