<i>Historic Stocking (last year stocked):</i>	none
<i>Contaminants (species tested):</i>	no testing done
<i>Assessment:</i>	<i>Completed Projects:</i>
	1967 lake survey

Synopsis

Ingrams Lake, situated in Livingstone Township, flows directly into Kimball Lake. In 2005, the existing ban on the use of live baitfish was removed from the lake. Though other species may be introduced with the ban not in place, the presence of yellow perch precludes the active management of the lake for brook trout. The brook trout population is expected to be low.

Updated: 2012
