<i>Current Stocking:</i>	None
<i>Historic Stocking (last year stocked):</i>	None
<i>Contaminants (species tested):</i>	none
<i>Assessment:</i>	Completed Projects:
	1977 lake survey

Synopsis

Pickerel Lake is a relatively remote lake with a native walleye population. Although there are no records of stocking, smallmouth bass may be introduced. The only information available is the 1977 lake survey. Bass and walleye fishing were reported to be good. The private land at the narrow point in the lake is the site of a former sawmill.
